

Project Objectives:

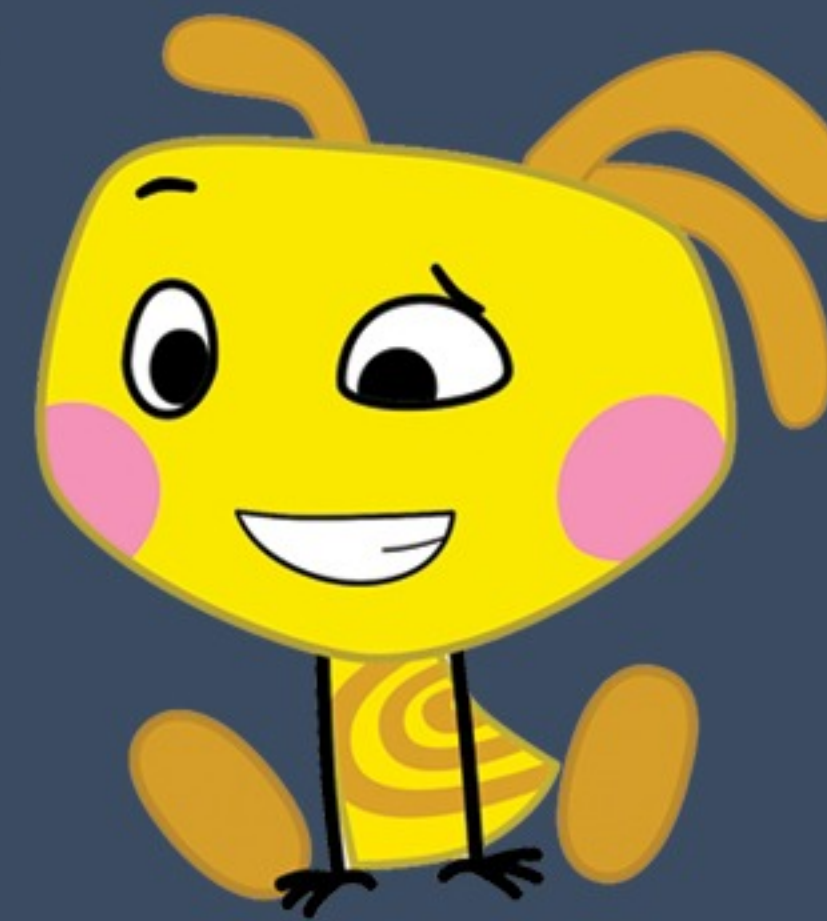

Exploring the issues and problems of young children from a new perspective and teaching life skills suitable for their age group without borrowing from foreign models. This project addresses the fears, emotions, and problems of young children, and teaches social, life, and personal skills within the capabilities of this age group.

Different neighborhoods are utilized in this project, each representing a psychological state of childhood. Ultimately, by balancing all these states, the "Kuchul Neighborhood," which is essentially the character of a young child, reaches a normal state.

THE CONCEPT SPACE

TINY TOWN IS A CITY IN A FICTIONAL WORLD,
 FEATURING A VARIETY OF UNIQUE NEIGHBORHOODS.
 FOR EXAMPLE, THERE'S SHY LANE, WHERE EVEN THE
 TREES ARE SHY, PROUD DISTRICT, LAZY ALLEY, AND
 MANY MORE.

THE TINIES, COLORFUL LITTLE CREATURES, EACH HAVE
 DISTINCT PERSONALITIES AND ARE NAMED BASED ON
 THEIR TRAITS. THEY LIVE IN THESE NEIGHBORHOODS
 AND FORM FRIENDSHIPS WITH ONE ANOTHER.

SOMETIMES, THE TINIES FACE CHALLENGES IN THEIR
 INTERACTIONS, BUT THROUGH COLLABORATION AND
 MUTUAL SUPPORT, THEY FIND SOLUTIONS AND
 OVERCOME THEIR DIFFICULTIES TOGETHER.
